HORIZON ENGINEERING CONSULTANCY SERVICES

Horizon Engineering Consultancy Services (HECS) expertise in engineering technological services and solutions. Company provided services to a customer across a wide range of engineering solutions for Automotive, Manufacturing Product Design and Development, Marine / Shipping, Oil and Gas, Petrochemical and Power Sector. HECS also Outsource Manpower to a client site as per customer requirement. Our harmonious, surveillance to the key deliverables of client gratification, timeliness, perfection and a clear idea of developing long-term relationships have ensured that we have satisfied clients across the world. We are different from other engineering services providers are our high rectitude levels, multi - cultural ideas and commitment to utilize all required resources to meet our dedications. Our engineering expertise people working on client's projects has a good alliance of engineers over various disciplines with outstanding experience in various sectors, software tools, and project management skills, with a quality experience in working on domestic/international client project.

We are in roof unique solution provider for product design and development of mechanical / automobile engineering services with end to end potential over the product development lifecycle. We provide customized engineering design services that meets your

AUTOMOBILE
ENGINEERING

project requirements. We specialize in delivering cost effectiveness, high productivity and timely services ranging from all types of CAD, CAM and CAE solutions leading to complete product design and development. Our collaborative capabilities lead to next level of the value chain, providing prototype, tooling as well as manufacturing the actual components.

HECS offers single-source EPC and EPCM services. Our goal is to allow you to focus on the productivity and profitability of your project. We utilize the latest 3D modeling software for each phase of definitive design, right through to the production of documentation for construction. We'll customize our delivery to suit your project development strategy - we are

PLANT ENGINEERING

accustomed to roles in a wide range of contractual relationships including : due diligence design consultancy, independent inspection, EPCM, EPC, plant owners & strategic alliances.

HECS is a leading independent consultancy providing a comprehensive range of design, engineering and project management services to shipyards & ship owners around the world. Our innovative, customized solutions cover areas ranging from Concept and Basic Design, to the building and conversion process of all types of maritime vessels & offshore structures.

Outsourcing is a practice where a HECS hires or enters into an agreement with an external organization or services to perform certain operation or functions. India has always been appreciated for its skilled manpower. It has become a popular choice for meeting the manpower outsourcing requirement of several companies across the world.

HECS provides various software training and skill development programs with our associate partners. Training & Skill development initiatives will help actualize the inert potential to meet the rapid growing demand of professional engineers and across the country and Worldwide.

HORIZON ENGINEERING CONSULTANCY SERVICES

HECS provides end - to - end services offerings that can help your company develop complex mechanical designs and products, reduce time-to-market, and penetrate existing and emerging markets. Our services include product design, analysis prototyping and testing, manufacturing engineering, petrochemical and power plant and construction engineering, marine/shipping design & engineering process support using leading CAD/CAM/CAE technology.
